

Summary of Consumer Satisfaction Survey

FFY 2015 Consumer Satisfaction Survey

The Consumer Satisfaction survey is a requirement of the Rehabilitation Act. This survey is used to review and analyze the effectiveness of the public Vocational Rehabilitation Program's consumer's satisfaction with:

- Functions performed by the VR Agency;
- VR services provided by the State VR Agency; and
- VR services provided to VR consumers.

The consumer satisfaction survey is a joint project between the Division of Rehabilitation Services and the Board of Vocational Rehabilitation. In the past, the surveys have been completed once in every three years. The Division is now conducting consumer satisfaction surveys as an ongoing process. The consumer satisfaction surveys are categorized into three areas that were determined reflecting the Rehabilitation Services Administration's proposed performance indicators in measuring consumer satisfaction. The surveys each have 6 questions that target the following three areas:

1. Satisfaction of Informed Choice
2. Satisfaction with Services
3. Satisfaction of Employment Outcomes

Quarterly, the Division of Rehabilitation Services utilized the case management system to generate a data download of individuals randomly selected to receive the survey. This data download is then used to generate the postcards. Individuals can enter in their results directly through the internet, call a toll free number, or return their postcard. The surveys do not identify the consumer's name but they do contain a case identification number that could be used to cross reference valuable information in the case file such as disability, district office, age, etc.
