

3.1 IL Assessment

A thorough IL Assessment can determine the need for:

- **Additional program referrals**
- **Education of programs outside CIL**-having a conversation with an IL participant about the services they need in addition to services that an IL Specialist can provide will give you an opportunity to educate them on other programs that are available which might assist them with their needs.
- **IL Skills training-detailed goals**-a good assessment can identify what skills a participant has, and what skills they need to learn to live independently in their own home and community
- **HMAD/AT/TAD**-it can address needed adaptive devices, ability to communicate, and need for assistive technology

The initial referral reason on an application may just be the beginning. Completing an IL assessment thoroughly will likely assist in identifying multiple need the IL client may have.

As a result of the completion of an IL assessment, it can assist with establishing IL goals. [Click here](#) to access the IL Assessment Form.
